Re: Records Requests

Dear Mr. Chapman:

This letter is in response to your request for all Database Management Systems utilized by the City as well as metadata for all electronic mail sent or received by City managed accounts during the month of January 2017.

If such records exist, producing them would violate Wyoming Public Records Act, Wyo. Stat. § 16-4-203(d)(xii). The Act provides the City “shall deny” the right of inspection to any information regarding the elements and components of information technology security systems. City IT staff has identified the information you seek as part of the City’s information and technology security system.

For this reason, I have advised the Cheyenne Information Technology Department not to release the records you have requested.

Sincerely,

*Logan Sharpe*

Logan Sharpe  
Assistant City Attorney
